

To create the client's general idea about the type of event they want to celebrate requires basic tools. One of them is the customization, specially when it comes from a Japanese catering. Therefore, we would like to make a brief overview of the services we are able to offer.

Whether weddings, inaugurations, business meals in private homes, etc ..., we always try to create the right atmosphere of what should be an event with Japanese cuisine. Therefore we like to offer the "*Yatai*", a Japanese house where a specialist chef prepares "*sushi*" to the guests that will also see how "*yakitori*" and "*tempura*" in a specially tables equipped for it. If we add to all this the right choice of linens, chopsticks, dishes and flowers, this special framework will get to sample what really matters, our kitchen.
